

: ASTList

```
graph TD; A[": ASTList"] --> B[": ASTLeaf  
token = 3"]; A --> C[": ASTLeaf  
token = +"]; A --> D[": ASTLeaf  
token = 4"];
```

The diagram shows a root node labeled : ASTList at the top. Three arrows originate from the bottom of this node and point to three child nodes below. Each child node is labeled : ASTLeaf and contains a token value. The left child has token = 3, the middle child has token = +, and the right child has token = 4.

: ASTLeaf

token = 3

: ASTLeaf

token = +

: ASTLeaf

token = 4
